

Derek Hurd's Consultation Comments: March 21, 2023

1. Good that the cantilever is still present.
2. I don't know that the vertical trellis elements on the catwalks help anything and it interrupts the horizontal strength of the building (opinion, not code). I also don't know if they are going to execute that, so if they aren't, remove it from the renderings.
3. Agree on matching the siding on the HVAC screening.
4. Roof deck looks fine.
5. What will the furniture in the furniture zone be? Something designed and integrated and appropriate for the architecture, or basic bolt down cheap and ugly?
