To Whom It May Concern:

I am a homeowner in Lakeland Village and oppose the proposal to increase the traffic along Heceta Head Drive. The ponds and waterways along Heceta Head Drive, are the home to protected and endangered species, in addition to Heceta Head Drive currently being a quiet peaceful neighborhood where children and families play and swim, pets are walked, and families bike, walk and jog. There have been numerous accidents at the end of Heceta Head where Lakeland Access meets State Street; more traffic along this road will exacerbate this problem. How could you, in good conscience consider adding to the traffic in the area which would decrease the quality of life for these families, wildlife and domestic animals in addition to placing them at risk. We already see too much road kill from cars hitting ducks, geese and other wildlife in this area. We have a blue heron that enjoys walking around the ponds along Heceta Head. The protection of this beautiful bird alone is reason enough to deny the request to increase traffic in our neighborhood along Heceta Head Drive.
